

Video Storyboard Template

Use this video to plan. For the storyboard below, it may be easier to print out and draw simple sketches and write notes. The “diagram” should be simple, like stick figures, that help you know what types of shots and angles you will take. Motion can be described in the video. Music and narration can be described in Audio.

Title of Video:	How to use 3D Printer
Running Time (Planned):	1 mintue 30 seconds
Learning Objective:	The students will be able to use 3D printer to print object
Materials Required:	3D printer
Location(s) of Shooting:	My school laboratory
Preparation Required:	Access to 3D printer

Storyboard
